**Code42 API resources**

Who is this article for?
Find your product plan in the Code42 console on the Account menu (https://support.code42.com/Administrator/Cloud/Code42_console_reference/01_Code42_console_overview#Account_menu).

- √ Incydr Professional and Enterprise
- √ Incydr Basic and Advanced
- √ CrashPlan Cloud
- √ CrashPlan for Small Business (https://support.code42.com/Small_Business)
- Ø Other product plans

This article applies to **Code42 cloud environments**.

Other available versions:

**On-premises** (https://support.code42.com/Administrator/6/Monitoring_and_managing/Code42_API_resources) (https://support.code42.com/Administrator/ Identify_your_Code42_product_version_role)

**Overview**

The Code42 APIs are a powerful set of tools you can use for everything from performing automated actions to integrating Code42 with your company’s security applications. This page lists resources for using the Code42 API.

**Incydr APIs**

If you have an **Incydr product plan** (https://support.code42.com/Terms_and_conditions/Code42_customer_support_resources/Code42_product_plans#Incydr_product_plans), see the **Code42 Developer Portal** (https://developer.code42.com/) for API documentation and resources. The portal provides:

- A single request URL (https://developer.code42.com/api/#section/Getting-started/Request-URLs) for Code42 API calls to each cloud instance
- **API reference documentation** (https://developer.code42.com/api/) as well as guides that describe how to use the APIs

https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources)
Resources

- Get started (https://developer.code42.com/api/)
- Forensic Search API (https://developer.code42.com/forensic-search-api/#forensic-search-api)
- Detection list management APIs (https://developer.code42.com/detection-list-management-api/#detection-list-management-api)
- Manage security alerts with the Code42 API (https://developer.code42.com/detection-list-management-api/#detection-list-management-api)

Code42 for Enterprise and CrashPlan for Enterprise APIs

If you have a Code42 for Enterprise or CrashPlan for Enterprise product plan (https://support.code42.com/Terms_and_conditions/Code42_customer_support_resources/Code42_product_plans#Incydr_product_plans), see the API resources below.

Get started

Learn about the Code42 API.

- Introduction to the Code42 API (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Introduction_to_the_Code42_API)
- Code42 API syntax and usage (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Code42_API_syntax_and_usage)
- Tools for interacting with the Code42 API (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Tools_for_interacting_with_the_Code42_API)
- Sample uses of the Code42 API (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Sample_uses_of_the_Code42_API)
- Code42 API authentication methods (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Code42_API_authentication_methods)
- Code42 API examples on GitHub (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Introduction_to_the_Code42_API/Code42_API_examples_on_GitHub)

Detect and respond to insider risks

Integrate the Code42 API with your security team's applications to streamline your company's insider risk response.

- Forensic Search API (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Forensic_Search_API)
- Detection list management APIs (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Detection_list_management_APIs)
- Manage alerts with the Code42 API (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Manage_security_alerts_with_the_Code42_API)
Search Audit Log events with the Code42 API (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Search_Audit_Log_events_with_the_Code42_API)

Customize applications monitored for file exfiltration (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Customize_applications_monitored_for_file_exfiltration)

Cases API (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Cases_API)

Integrate with Splunk

Integrate the Code42 API with Splunk (https://www.splunk.com/).

Install and manage the Code42 Insider Threat app for Splunk (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Install_and_manage_the_Code42_Insider_Threat_app_for_Splunk)

Code42 Insider Threat app for Splunk
To quickly and easily view file exposure activity in Splunk, helping you identify insider risk, use the Code42 Insider Threat app (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Install_and_manage_the_Code42_Insider_Threat_app_for_Splunk) instead. You can also use the Code42 for Splunk (Legacy) app (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Install_and_manage_the_Code42_for_Splunk_Legacy_app) to display basic Code42 data in Splunk Enterprise or Splunk Cloud.

Use cases

Leverage the Code42 API for specific use cases.

Use the Code42 API to set SAML attributes (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Use_the_Code42_API_to_set_SAML_attributes)

Use the Code42 API to automate push restores (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Use_the_Code42_API_to_automate_push_restores)

View device backup status with the Code42 API (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/View_device_backup_status_with_the_Code42_API)

Customize email templates (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_API_resources/Customize_email_templates)

Code42 integrations resources
For methods other than Code42 APIs to integrate Code42 with your security tools, see Code42 integrations resources (https://support.code42.com/Administrator/Cloud/Monitoring_and_managing/Code42_integrations_resources).
